---

**SKILLS**

**Software:** HTML5, CSS, JavaScript, React, Office suites, Illustrator, InDesign, Photoshop

**Leadership:** self-motivated, problem solver, team player, logistics, project management, communication

---

**TECHNICAL PROJECTS****JavaScript Application (Pokédex)** - [Github](#) | [Demo](#)

An application where the user is able to view a list of data and see more details for a given data item on demand.

- A small web application built with HTML, CSS, and JavaScript that loads data from an external API and enables the viewing of data points in detail
- Created an aesthetically pleasing and easy to use application using CSS
- Loads data from an external API via fetch
- Displays a list of items with on user action (e.g., by clicking on a list item), viewing details for that item

**Meet App** - [Github](#) | [Demo](#)

This application uses the Google Calendar API to fetch upcoming events for the user.

- Built a serverless, progressive web application (PWA) with React using a test-driven development (TDD) technique
- Uses Google Calendar API to fetch upcoming events
- Combines Serverless and PWAs
- Using a TDD approach, I wrote the tests before writing the actual functionality for the app in code
